ami
100% ELECTRIC

Ami isn't a car - it's an all-electric two-seater quadricycle! Ami offers you a new approach to tomorrow's urban mobility needs today. It has two spacious seats, is ultra-compact and it couldn't be easier to drive! Quiet and responsive, it features a 6 kW electric motor for instant acceleration and agile driving. The interior is surprisingly spacious, has space for luggage and features a near-360 degrees of glass coverage, providing you with great visibility wherever you look.

Ami features a range of up to 46 miles (WMTC test cycle), ideally suited for most daily journeys - whether that's popping to the shops, getting to and from work or meeting up with friends for a coffee. As Ami is a light quadricycle, it requires a minimum of an AM licence to drive.*

FULL CHARGE IN 4H

AMI can be recharged from a public charging point or Wall Box using an adapter.

ULTRA-COMPACT AND HANDY

At 2.41 m long, AMI is a practical size. And it only takes up half a parking space! Its turning circle of 7.20 m allows AMI to manoeuvre around town and makes it considerably easier to get around parking.

LARGE GLASS SURFACE

The image shows the interior of a vehicle from a driver's perspective. A woman with long dark hair is driving, her hands on the steering wheel. In the passenger seat, a woman with short hair is smiling and holding a basketball. The vehicle has a panoramic roof and large windows, providing a clear view of the outside world. The lighting is bright, suggesting daytime. The overall atmosphere is one of spaciousness and comfort.

Thanks to its panoramic roof, AMI offers a real feeling of space and brightness, enhanced by the wide windscreen and side windows. These large windows provide excellent visibility for both driver and passenger.

MY CITROËN APP

The DAT@AMI* connected box gives you access to all AMI data: available range, mileage, time remaining for a 100% charge, maintenance alerts and the location of charging points. A USB socket is reserved for your smartphone.

* Available from accessories.

INGENIOUS STORAGE

On board, every nook and cranny is exploited to the full: A storage area at the passenger's feet can accommodate a cabin-size suitcase. There are a number of other intelligent storage compartments in the cabin, particularly at the rear.

MY AMI PLAY

Access your favourite applications: navigation, music, radio, phonebook... via the "Citroën Switch" function, which allows you to connect your smartphone via Bluetooth and activate the "Citroën Switch" function. "My Ami Play" brings them together on the same page.

PRODUCTS LIFESTYLE
